Art Unit: 1621

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 7-10, drawn to reaction product, classified in class 564, subclass 44.
 - II. Claims 29-33, drawn to improved plant seed, classified in class 504, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for herbicidal application. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and being divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Walter Brookhart on 8/13/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
